

## Dear Fellow NASA Members,

My name is Melody Dalley, and I am asking you to elect me as your Vice President of Membership Services next week. I have been a NASA member for 15 years, teaching for the Instrumentation and Electrical programs. As an active member of the Membership Services Committee for the last 4 years, I have gained experience hosting many of NASA's Back-to-School luncheons and Winter Frolics. In addition, I have volunteered with Habitat 4 Humanity and the Edmonton Folk Music Festival, and I have contributed to humanitarian events that have benefitted Edmonton's inner-city community members. If elected as VP of Membership Services, I will bring all of this experience to help us navigate this unprecedented time.

Ever since the pandemic forced NAIT to close its campus, we have all been learning how to instruct, juggle our home and work lives, and care for one another at a distance. As a mother of four and caregiver to a senior, I know all too well the fine balance we strive for in life and will therefore be empathetic and responsive to your needs and inquiries. With that in mind, I will guide Membership Services through these new challenges, developing new strategies for providing NASA activities that respect physical distancing guidelines. If physical distancing is no longer required, I will ensure that events follow proper sanitary protocols to help you feel safe when attending them. As well, I will continue to support gift-card giveaways and bring in speakers who can provide insight into areas of your interest and concern.

While the world we now know differs so much from the one we are accustomed to, I assure you that I will keep your well-being and safety my utmost priority. I am counting on your support to elect me your Vice President of Membership Services so that I can help NASA executive guide us through the bumpy road ahead.

Thank you for your time and consideration.

**Melody Dalley** RSE
