

Hi all,

I'm running for a position on Academic Council. My bio is short because I hate writing those things, but I thought I should write to share why I am interested in serving on Academic Council. As a Curriculum and Instruction Specialist who has been in higher ed for 15+ years as an instructor, coordinator, chair, and now Curriculum and Instruction Specialist, with six of those years at NAIT, I have had the opportunity to engage with people in many roles in the institution, and I have a good view to how things work and how change occurs. At NAIT, I've been honoured to work with dedicated program instructors from all four Schools, librarians, counsellors, and fellow C&I Specialists, and I'm hoping to represent all of the NASA membership to advocate for our needs and interests while also fulfilling our purpose of supporting student success.

Those of you who know me should know that I will approach this role like I do all aspects of life...with authenticity and integrity. With me, what you see is what you get. If you are looking for a representative who is willing to listen to all and says what she means and means what she says, please vote for me.

With utmost respect for you and for all my fellow candidates,

Angie
